

Transfer of Claims re: Claims Agents, Consolidated Cases (WO 5895) [All Users]

The Transfer of Claim events has been updated to facilitate filing in cases where a Claims Agent has been appointed or the original claim was filed in a consolidated member case. In both instances the user can skip the claim relating process since the claim is not on file in ECF. Claims agents will issue notice of the transfer in cases in which one has been appointed, and the Clerk's Office will issue notice of the transfer in cases where the claim was filed in the member case but the transfer was filed in the lead case. The Van30 Mega-insert Notice event has been updated for use by case managers if a notice of transfer of claim is needed.

Orders Granting Relief from Denial/Revocation of Discharge (WO 5452) [Court Users]

The Order on Motion for Relief from Judgment/Order event has been updated to automatically spread from the adversary docket to the bankruptcy docket if relief from the denial or revocation of discharge is granted. Messages in the event have been updated to instruct case managers to issue – from the bankruptcy case – the discharge (if discharge was denied) or a new Notice of Reinstated Discharge (if discharge was revoked). The new notice will be auto-QCed. The order event will be QCed in CMAssist when filed in an adversary proceeding and will be pooled.
