

Extension of Time to File Initial Documents (WO 5921) [All Users]

Per Local Rule S.D.Ind. B-1007-1(c), notice is waived for the first extension of time to file initial documents (i.e., documents required to be filed with the petition). However, any subsequent requests to extend time must be served by the filing party on parties listed in Fed.R.Bankr.P. 1007(c). The Motion to Extend Time to File Initial Documents event has been updated to display a message about the service requirement if the motion was previously filed.

Notice of Change of Address re: Adversary Proceedings (WO 5958) [All Users]

The Notice of Change of Address event was not set up correctly for adversary proceedings. The event has been updated and filers can now file a change of address in an adversary proceeding for any party or attorney.

Message Displayed on ECF Login Screen (WO 5969) [All Users]

The message about free noticing which is displayed on the ECF login screen for outside users has been replaced with a message about remembering to clear your cache.

Conversion Events re: Updated Message (WO 5768) [Court Users]

The terminate deadline message displayed in conversion events for court users has been updated. When a chapter 13 case is converted to a chapter 7, the terminate deadline message specifically states that the proof of claim deadline should be terminated.

Motion to Shorten Notice Time re: Emails to Staff (WO 5946) [Court Users]

The Motion to Shorten Notice Time event is set up to send an email to courtroom/chambers staff. A recent filing not only sent email to the correct staff, but also sent an email to another email group erroneously. The email function in the motion event has been modified, and emails now only go to the correct staff.

Form Variables Table (WO 5961) [Systems Staff]

A form variable is information passed from an event to a form, and the variables are stored in a Forms Variables Table. Sometimes blank variables are passed to a form, and those blank variables clutter up the table. A programming change has been made so blank variables are no longer stored in the table.
