

## **New Fees Effective 12/1/13 (WO 5971) [All Users]**

Effective 12/1/13, a new fee of \$176.00 will apply to motions to sell property free and clear of liens. Also, the Archive Retrieval fee will be increased to \$64.00, with a fee of \$39.00 for each additional box.

---

## **Motion for Turnover (WO 5955) [All Users]**

The Motion for Turnover event is now available for use by chapter 11 debtors, when appropriate.

---

## **Sealed Documents re: New Process (WO 5241) [All Users]**

Rather than submitting sealed documents on paper, sealed documents should be filed electronically using the new Sealed Document event found on the Miscellaneous menu. A Motion to Seal Document must be filed and granted prior to filing a sealed document. Only judges, court users with admin rights, and the filing attorney are given rights to view the sealed document.

---

## **Extension Orders (WO 5930) [All Users]**

Orders granting motions for extension of time no longer include the phrase, "as to filing party only." Not all extensions of time are limited to the filing party and the inclusion of the phrase on all extension orders was causing confusion.

---

## **Reply Deadline in Response Event (WO 5938) [All Users]**

When a response to a motion to dismiss adversary proceeding was filed, a reply deadline was set for 7 days. The reply deadline is no longer required due to a local rule change, and it has been removed from the Response event.

---

## **Withdraw Motion to Dismiss or Objection to Plan (WO 5953) [Chapter 13 Trustees, Court Users]**

Chapter 13 trustees may now file a Withdraw Document "docket only event" (i.e., no PDF attached) when they need to withdraw their motion to dismiss or objection to plan prior to a hearing.

---

## **Order to Appear and Show Cause (WO 5979) [Courtroom Services]**

The Order to Appear and Show Cause event includes a "sanctions or contempt" radio button so the correct text can be added to docket text and the signed docket order. Docket text did not correctly reflect "sanctions or contempt" when that radio button was selected. The event has been fixed, and docket text correctly reflects information from the radio button selected.
