

Time Clock and Work Order Search (WO 4680) [Court Users]

This WO covers two different issues:

- Time Clock: Some minor behind-the-scenes bugs have been corrected.
 - Work Order (WO) Search: A new icon will be available on court users' Zenworks Windows to allow users to search WOs for upcoming changes, WOs they have submitted, etc.
-

Judgment Book Orders (WO 5954) [Court Users]

All orders granting motions to avoid judicial liens will be auto-added to the Judgment Book, and all previously docketed judicial lien orders will be added to the Judgment Book via a program. Users will be asked if an order should be added to the Judgment Book when an order is docketed on an adversary and the Judgment Book checkbox has not been checked. The Judgment Book question will be skipped for certain types of orders, such as dismissals, extensions of time, hearing orders, etc.

Continued 341 Meetings Due to Inclement Weather (WO 6016) [Court Users]

The event used by trustees to continue 341 meetings due to inclement weather is set up so trustees do not have to upload a PDF, but the docket text didn't state that there was no PDF attached. The inclement weather event has been updated and now includes the phrase "docket only entry".

Electronic Exhibits re: Adversary Trials (WO 6026) [New Albany CRDs]

The event used to issue hearing notices on adversary proceedings has been updated to ask the user if electronic exhibits will be required. The question is only asked on New Albany adversaries, and answering yes will add the standard electronic exhibits paragraph to the hearing notice.
