

## **Sealed Case Event re: Updated Messages (WO 5241) [All Users]**

The messages displayed in the Motion to Seal Case, Order on Motion to Seal Case, and Involuntary Petition events have been updated to reflect our current procedures.

---

## **XFA Documents (WO 6051) [All Users]**

An XFA document is created by the Adobe LifeCycle program and is similar to a PDF document, except that it contains fields that can be edited. The Administrative Office of the U.S. Courts recommends disallowing XFA documents from being uploaded into ECF, so the document verification program has been updated to prevent filers from uploading these types of files.

---

## **Notice of Filing of Transcript (WO 6052) [All Users]**

The notice issued to parties when a transcript is filed has been updated to include the transcriber's email address.

---

## **Private Entries re: Bug Fix (WO 6036) [All Users]**

Private entries, such as case notes, were being distributed by NEF to outside parties when docketed on member cases. The problem has been fixed and NEFs are no longer issued on private entries.

---

## **Orders on Reaffirmation Agreements (WO 5728) [Court Users]**

A standard order has been created for use with reaffirmation agreements. The new SDO can be used to approve or disapprove reaffirmation agreements. The event used to docket the order has been updated also.

---

## **Order Distribution Text re: Bug Fix (WO 6048) [Court Users]**

Order distribution text is added at the end of orders to inform users who is responsible for serving the order. If the role type of the party required to distribute the order was more than one word, the distribution text did not display correctly; i.e., "petitioning creditor" was displayed as "petitioning". The bug has been fixed and party roles all display correctly.

---

## **Order on Motion to Extend Exclusivity Period (WO 6050) [Court Users]**

This order has been updated to set a docket-text only deadline rather than setting deadlines for the chapter 11 plan and disclosure statement.
