

Amended/Corrected Petition Event (WO 6083) [All Users]

This event has been updated to add more amendment options. New check boxes allow users to indicate if any of the following statistical items have been updated: Type of Debtor, Nature of Business, Estimated Number of Creditors, Estimated Assets, Estimated Liabilities, Small Business Designation. The updated information is auto-added to the case database. Additionally, if a debtor changes their Nature of Business designation to "Health Care Business", a deadline is set for appointing the Healthcare Ombudsman and an email is sent to chambers.

341 Meeting Notices on Converted Cases (WO 6112) [Trustees]

The event that terminates the original trustee and adds the new trustee on a converted case was updated in May to use an automatic assignment program that also auto-issues the 341 meeting notice. A recent call from a trustee revealed that the automatic programming was causing the 341 notice to be sent to both the original and the new trustee. The automatic program has been updated and terminated trustees will no longer receive 341 meeting notices.

ePOC/eWOC: Claim Filing/Withdrawal Program (WO 6109) [Court Users]

This program has been updated behind the scenes to strengthen security measures.
