

Notice of Deadline to File Proof of Claim or Interest (WO 6127) [All Users]

This new event is now available for use in chapter 11 cases after the court has granted a motion to set the last day to file claims.

Signed Orders Report re: Bug Fix (WO 6171) [Court Users]

A hold placed on a Wage Assignment Order on the Signed Orders Report could not be removed, so the order could not be docketed. A minor programming change has been made and users may now remove the hold on any type of order.

Generate Notices re: Bug Fix (WO 6174) [Court Users]

Users may save their preferences (e.g., date range, forms, etc.) for how the Generate Notices screen displays. It was discovered that the Recreate Radio Button could be saved as a preference behind the scenes. When this happens, only previously issued notices are displayed and the user cannot access new notices. A programming change was made so the Recreate Radio Button will no longer be saved as a preference.
