

Report of Sale re: Compromise & Settle (WO 6603) [Trustees]

The Report of Sale event has been updated to allow trustees to relate the report to an Order on Motion to Compromise & Settle when required by the U.S. Trustee.

Case Link & Dismissal Information (WO 6604) [All Users]

A case link, which allows users to access the docket, is displayed at the top of the screen during docketing. If a case is closed or dismissed, that information is displayed next to the case number link. Dismissal information was displaying incorrectly for joint cases where only one debtor was dismissed. The error has been corrected.

Bankruptcy Case Dispositions & Adversary Dockets (WO 6611) [All Users]

When a bankruptcy case is closed or dismissed, that information is now displayed next to the bankruptcy number at the top of the adversary docket.

Event Search Option & Closed Cases (WO 6610) [All Users]

Outside users are prevented from filing events that set deadlines on closed cases until the case has been reopened. Using the Search option to select an event rather than using a menu bypassed this restriction. The Search option has been updated to work the same way as menus; i.e., events with deadlines cannot be docketed on closed cases.

AutoDischarge Program (WO 6609) [Case Managers]

The AutoDischargeReady flag was originally used to verify that cases were being auto-discharged correctly. The flag is no longer needed and will no longer be set.

Awaiting 341 Meeting Notice Report (WO 6606) [341 Calendaring Clerks]

This report has been tweaked to display all pending cases that do not have a 341 meeting notice on the docket. If a case is dismissed, it will show up on the report when the case is reinstated.
